

District Technology Goals  
Cedar Grove-Belgium School District

*Technology in the classroom is about sharing knowledge and information, communicating efficiently, building learning communities and creating a culture of professionalism in schools. These are the key responsibilities of all educational leaders.*

Improve Student Achievement

- Provide opportunities for all students to learn technology skills.
- Ensure all students have access to instructional resources that incorporate digital content.
- Ensure all students demonstrate proficiency in technology literacy.

Implement Effective Teaching and Learning Practices

- Create a digital learning K-12 environment.
- Improve staff knowledge and skills.
- Ensure digital content accommodates diverse learning needs.
- Challenge staff to stay informed of current and emerging technologies.

Provide Access to Information Resources and Learning Tools

- Utilize instructional media resources to promote student collaboration.
- Develop purchase and technology utilization plan.
- Continue to expand makerspaces.

Identify Support Systems and Enhance Teacher Leadership

- Utilize gradual release of responsibility instruction components.
- Develop processes and procedures that support the acquisition and utilization of new and emerging technology.
- Invest in leadership opportunities for teachers.
- Create method for sharing of resources among staff and administrators.
- Provide a K-12 healthy digital environment.

Assess Hardware and Software Needs

- Increase access to mobile technology at the elementary level.
- Upgrade existing educational hardware.
- Evaluate district software.

*Change is necessary to engage all students.*
